CryptoESIGN

Cloud eSignature Software

Seeing an Increase in Adoption of eSignatures

Physical handwritten (wet ink) Signatures becoming cumbersome and expensive

Push for digital transformation

Push for workflow efficiency and increase in productivity

Remote working becoming prevalent

Geographically dispersed teams & clients

Heightened demand for security in documentation handling

Companies looking for reduction of operational costs

Laws of countries globally recognizing eSignatures

eSignatures reduce the incidence of fraud

Enforces audit trail as they cannot be back dated

Better control & compliance

Ease of use and implementation of eSignatures

Introduction to CryptoESIGN

CryptoESIGN is a cloud-based and modern electronic signature tool built on the principle of Self-Explanatory User Interfaces (SEUI).

Single Screen User Interface
CryptoESIGN allows for creation and signing of documents within a single screen interface

Quick & Easy
CryptoESIGN has a built-in guided interface, with self-explanatory videos for each step to help guide the user process the documents efficiently & accurately

Fill & Sign
CryptoESIGN's fill & sign tool enables one to easily fill, sign, and send the forms or documents online

Invite Multiple Signers
With CryptoESIGN the user/creator can easily invite multiple signers to sign a single document simultaneously

Eco-friendly
CryptoESIGN helps avoid unnecessary printing and thereby, contributing towards the paperless transaction evolution

Secured Cloud Storage
CryptoESIGN offers a secured and centralized cloud storage, which is embedded with 256 bit AES encryption along with SSL encryption

Workflows
CryptoESIGN has user defined workflows where one can define his/her own workflows based on their organization's hierarchy and requirements

API
CryptoESIGN offers API for both electronic and digital signatures that can be integrated into third party applications

Bulk Send
With CryptoESIGN's bulk send feature one can easily send a document to multiple people in one go
